

Carousel Brainstorming

This activity engages students by allowing them to move and talk about a concept. Students can move around the room to read quotes, answer questions or complete activities at various stations. Students should be divided into groups of 3-5 and travel to an equal number of stations. The average time at each station is 3-8 minutes. Give each group a different colored marker so you can identify their work.

Procedure:

1. Place each group in front of one poster.
2. Have them add ideas to the poster.
3. Students rotate to the next poster, read the previous comments and continue adding ideas.
4. Continue until all groups have visited all posters and have returned to their original poster.
5. Ask each group to read all the information at their poster and summarize the information.
